

Super 8/Standard 8 films

3" Reel 1-4 Reels \$50, 5+ Reels \$40 each, 5" Reel \$65 ea, 7" Reel \$105 ea, 8" Reel \$135 ea.

(Min charge \$50)

Duplicate DVD

\$10 each

Please remember, the quality of the finished DVD will be dependent on the quality of the original movies.

Rolls will combined onto Archival DVD's and chaptered unless specified otherwise.

The film transfer equipment for our 8mm is a custom made telecine built by a television engineer with over 40 years experience with broadcast television and film transfers. Films can be transferred at sound speed (25frames/sec) or the more usual 16-18 frame/sec used for home movies. In actual fact the films are transferred at 16 2/3 frames per second (for technical reasons) and locked in synchronisation with the camera which eliminates any flicker whatsoever. The light source is a high intensity LED light that has no heat so there can be no damage to the film if it stops in the gate. It also ensures a completely flat even light source with no "hot" spots that occur when using a projector (and results in poor quality transfers). Sound is captured in real time (unlike some systems) and can be captured from Super 8mm AND Standard 8mm film if it has sound. The sound pickup is uniquely designed to eliminate totally any of the clicking type sprocket noise that could often occur with projectors. The film frame is focussed upon directly in the gate so there are no intermediate optics or mirrors or screen used. The film is NOT projected onto anything. This gives the sharpest possible image free of any distortion. Films at 25frames/sec are of course scanned frame by frame but if home movies at the silent speed are scanned at that rate then they would be 50% too fast and everyone would be running round like an old silent comedy. This means if the films are transferred frame by frame but it has not been shot at 25 frames/sec, the captured movies must then be slowed down electronically afterwards. This is time consuming, costly and gains nothing. By transferring silent speed home movies at the correct speed in the first place, a complete conversion process is eliminated and the films run at the correct speed. Colour correction includes gamma (mid tone) control which helps bring out the detail in darker areas - this is lost if no gamma correction is used.

Service time on this service is approx 3-4 weeks and Archival Discs available at \$10 extra per disc. MP4 Conversion \$30 per DVD transferred.

Other movie film sizes and formats.

9.5mm pathe- \$60 min charge

50ft reel – 2 or more rolls \$40 each

400ft reel – 1 only - \$80 per reel, 2 or more \$65 per reel

Duplicate DVD \$10 each

* Note minimum scanning fee for 8mm movie films of \$50 and 16mm movie films of \$80

Please note copyright films will NOT be copied

16mm and 35mm Movie Film Transfer to DVD

16mm and 35mm are transferred on a former broadcast machine - a Rank Cintel Mark 3 Flying Spot Scanner. Formally used at one of Adelaide's TV stations it provides excellent quality. Both magnetic and optical sound can be captured for 16mm and optical for 35mm.

All 16mm and 35mm Movie scans are supplied on Mdisc media.

Film Length	Cost Per Roll	2 or more rolls to Same DVD
50 Ft	\$80	\$55 ea
100 Ft	\$90	\$65 ea
400 Ft	\$110	\$75 ea
800 Ft	\$130	\$95 ea
1200 Ft	\$160	\$140 ea
1600 Ft	\$200	\$180 ea
2000 Ft	\$240	\$210 ea
Others sizes will be quotes		

For several rolls onto 1 DVD, the 2 or more price applies per roll. For individual rolls to individual DVD, the single roll price applies, per roll.

VIDEO TAPE TO DVD

VHS, VHS-C, 8mm, Hi8, Digital8 and Mini DV tapes can be transferred to DVD

Pricing as follows:

VHS/Video8/8MM/MiniDV/VHS-C to DVD	\$30 each or \$25 for 10 or more
Beta/SuperVHS (SVHS) to DVD	\$45 each
HD MiniDV Tape to DVD (Min \$35)	\$1.70/min
Sony U-Matic Tape to DVD (Min \$45)	\$2.00/min
VHS to VHS	\$30 each
Copy DVD	\$10 each

Archival DVD's can be supplied at an additional \$10 per DVD

US Standard NTSC VHS to DVD	\$50/Hour
European Standard SECAM VHS to DVD	\$50/Hour

Maximum copy time to a DVD is 3 hours.

Please note that copyright films/tapes and recorded movies from TV or TV shows will NOT be copied.

See page 36 for Video file conversion costs.

STILL IMAGES FROM MOVIE FILMS, VIDEO TAPE or DVD

We also offer a service of still photos from movies.

All media HAS to be either a digital movie file, or be converted to a digital file.

Movie films and video tapes need to be converted to DVD as per the pricing on the previous page.

Print quality from any movie source will be "adequate" for 4" x 6" photos, and we would be hesitant to offer sizes larger than this.

Pricing is per 4" x 6" (10cm x 15cm) photo \$7.50

Photo file burned to CD \$5.00 per file

Very specific instructions need to be provided about which section you want a photo from, such as time from start of movie, speech, particular movement of a person etc.

We will do our best to get the photo you request

Please call if you need more information
